"We understand that the development of a product starts at the design stage but just as important are quality and production"

Companies with technological or industrial character know the importance of innova-ting to continue in the current market. In EDR torches this becomes a work philosophy, we understand that without innovation it is not possible to advance in such a competitive world where companies and professionals need increasingly com-plex solutions.

EDR torches has a strong R & D department dedicated to the deve-lopment of new welding applications, providing customized solutions both in the area of robotic welding and manual.

We understand that the development of a product begins at the design stage but just as important are the quality and production designed and tested.

The long experience of EDR torches in all sectors related to welding makes us capable of providing the best solutions to your manufactu-ring challenges, tell us what you need and we will make it possible.

AUTOMATIC series

WELDING TORCHES

Torch AUT 42G

MIG/MAG, GMAW,131,135
IEC60974-7

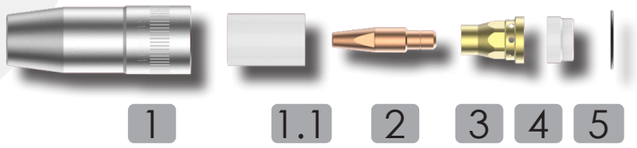

- Gas
- 300 A - CO2 100%
- 250 A - Mix M21 (ISO 14175) 100%
- Ø1.0-1.2 mm
- 10-18 l/min

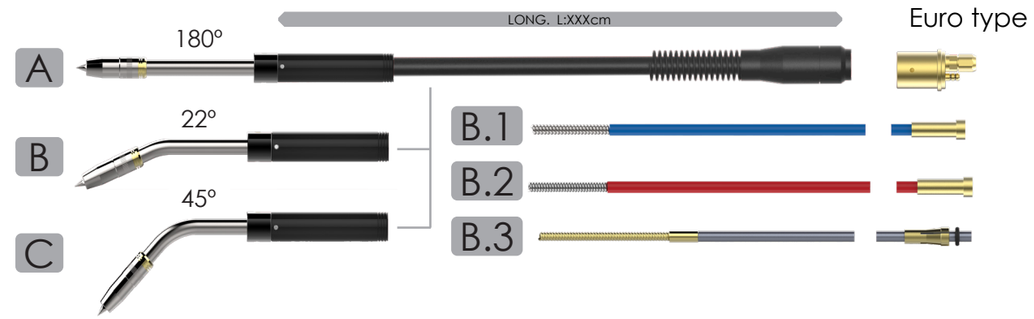

The capacity will be reduced by 35% whit pulsed arc.

The line of automatic torches adapts perfectly to all the standard automatic systems, with advantages superior to the standard ones.

The gas cooled vesion supports work cycles much higher than the most standard versions of the market. Larger nozzle and its M10 contact tips and large length make it behave perfectly in automatic systems.
